2. Actionable recommendations:

Term	Priority	Segment	Recommendation
Always	High	All	Mandatory 3-part email sequence
Immediately	High	Priority	Product improvement through better services
Short-term	Medium	Important	21-day free premium plan
Long-term	Low	Nice to have	Increase community level engagements

3. Risk prediction:

In future, through a predictive churn model, we may get a “high-risk segment” to empower proactive customer success outreach.
